input.1p

Java

```java
package q10776;

public class HolidaysCalculator {
    public static void main(String[] args) {
        short nationalHolidays = Short.parseShort(args[0]);
        short companyHolidays = Short.parseShort(args[1]);

        short totalHolidays = (short) (nationalHolidays + companyHolidays);

        System.out.println("totalHolidays = " + totalHolidays);
    }
}

```
